The marks

The F mark represents the company: hand-drawn strokes with rounded terminals, ending in three dots. The Otto cloud represents Otto, Fikirtive's AI marketing operator.

Never interchange the two marks.

The company

Otto

Ink — on light grounds

Paper — on ink

White — on photography

Coral — on paper or white only

Black tile
Formal contexts

Coral tile
Default identity

App icon · favicon
OS icon grids

Tile corner radius: 22.5% of the side; the app icon is rounder for OS icon grids. All tiles carry the paper mark.

Clear space and minimum size

x = the mark's height. Nothing enters the clear zone — type, marks, or the page edge.

Clear space

One quarter of the mark height ($x/4$), on all four sides.

Minimum size

Tile 16 px / 4 mm. Bare F mark 24 px / 6 mm. Lockup 24 px / 6 mm tile height.

Scaling

Scale proportionally. Use the official exports; do not redraw.

Placement

Browser tabs and app icons: coral tile. Formal documents: black tile. On color: paper or ink mark, inside a tile. On photography: the white mark.

Misuse

Do not recolor

Do not rotate

Do not stretch

Do not put the coral mark on color — use paper or ink

Do not add shadows, outlines, or glows

fikirtive

Do not re-typeset the wordmark

Wordmark and lockup

fikirtive

Lockup construction: tile height = x · gap = $x/3$ · wordmark height = $x/2$, centered on the tile. Reversed lockup uses the paper wordmark on ink.

Setting	Geist, weight 750, -3% tracking, always lowercase. Never re-typeset from another face; use the master asset.
Reversed	Paper #F5F1E8 on ink. Used on the back cover of this document.
In running text	Fikirtive.
Retired	FIKIRTIVE in all caps.
Legal entity	BELCORT SDN BHD.

fikirtive

Reversed — paper on ink

Otto

**Color**

Cloud #EC5828, eyes #2B1308. Unchanged on every background.

Role

Marks Otto's own activity. Never decorative.

Clear space

One quarter of the cloud's height. Never locked up with the F mark; the two marks never form one unit.

Minimum size

20 px / 5 mm. Below that, a coral dot.

Do not

Recolor, add a mouth, or place on human-action controls.

Expressions

Idle is the default. Every other expression marks a live product state.

Idle

Default state

Thinking

Planning, before a proposal

Helpful

Greetings and tips

Success

Work delivered

Waiting

Awaiting the merchant's approval

Warning

Attention needed before spending

Error

Something failed

Approved

Approved and running

Typography

Display	48 / 52 · 750 · -2%	Good morning, Nicks
Title	28 / 34 · 700 · -1.5%	Schedule for this week
Body	16 / 26 · 400	Otto drafts the plan. Nothing runs until you approve it.
Caption	13 / 19 · 500	Last edited 2 hours ago
Data	13 / 20 · Mono 400	1,240 cr · batch 2/4 · 9:16 · RM 2,350.00

Geist	All interface and marketing text. Variable weight, 400–800.
JetBrains Mono	Numbers and data.
Hierarchy	By weight and size, never by changing face.
Figures	Tabular figures in any column of numbers.
License	Both faces are open source under the SIL Open Font License (Vercel; JetBrains).

Sizes in px at web scale, with line height (size / line). Product surfaces derive their tokens from this scale.

Color palette

Composition target: 90% neutrals, 8% gradient accents, 2% coral. Semantic colors sit outside the ratio — they signal state only.

FOUNDATION

BRAND

SEMANTIC

Pairings. Text on neutrals: Ink for primary, Ink 2 for secondary, Ink 3 for captions. Text on semantic fills: white, for bold labels and badges. Ink as a full-bleed ground: covers and closing surfaces only. Digital-first palette: hex is the source of truth; print matching is defined when print work is commissioned.

Gradients

Linear, 135°, two stops.

Violet

#EDE9FE - #DBEAFE · text #3B3663

Start tiles, template cards

Peach

#FFEDD5 - #FFE1E1 · text #7C3D2A

Campaign tiles, empty states

Sky

#E0F2FE - #BAE6FD · text #2E4A66

Data cards, onboarding

Text

The matching deep tone shown on each tile, at 4.5:1 contrast or better.

Never

On buttons, body-text backgrounds, chart data, photography, or full pages. At most two tiles per screen, never two adjacent from the same family.

Coral

In product UI, coral marks Otto. Human-action buttons are ink #16171C.

Imagery

Photography	No stock photography. Use product screenshots, gradient tiles, or the Otto cloud.
Merchant work	Generated images and videos sit on a white card with a hairline border and soft shadow. No filters, brand-color overlays, or watermarks.
Illustration	Otto is the only illustrated character.
Icons	Thin-line geometric icons with a uniform stroke, colored to match the text. Icons never use coral.
Texture	A 16 px dot grid marks the canvas workspace only.
Gradients	Accent tiles on content only; rules in 03 · Color palette.

Merchant work — card, hairline, shadow

Canvas dot grid

Icon style — thin line, uniform stroke

Gradient accent tile

Audience

Small-business owners.

They run the store and the marketing alone: no team, and no time to learn prompting. They need plans they can read, costs shown before anything runs, and a record of everything that happened.

Global by default. Southeast Asia is the first market; copy never assumes it. Anything involving money is specific: amounts, counts, dates.

The test for every line of copy: readable in one pass.

Voice and tone

Two voices. The product is neutral and precise. Otto speaks plainly, in the first person. Both are honest about cost and status: serious about spending, calm about failure.

CONTEXT	SAY	NOT
Empty state	Nothing here yet — start your first canvas.	Your creative journey awaits! ✨
Before spending	4 images · 12 cr. Generate?	<i>Charging first; pricing hidden in a tooltip</i>
Errors	This didn't go through. Your credits are untouched — try again.	Oops! Something went wrong
Unshipped features	Publishing isn't switched on yet, so this stays a draft.	Coming soon!
Otto working	I'm making 4 images for "Raya promo" — 2 are done.	<i>A spinner with no words</i>

Grammar and style

Spelling	American English: color, favorite, organize.
Casing	Sentence case everywhere — titles, buttons, navigation. All caps only for small labels, with letter-spacing.
Oxford comma	Always: posts, images, and videos.
Currency	RM 2,350.00 — currency prefix, thousands separator, two decimals. Credits as 1,240 cr.
Dates	12 Aug 2026. Month and year: Aug 2026. Short contexts: Fri, 12 Aug.
Numbers	Numerals in UI copy: 4 images, 2 done.
Product terms	Fikirtive in text. fikirtive as the wordmark. Otto always capitalized; credits and canvas always lowercase.
Never	In customer-facing copy: “Coming soon,” AI vendor or model names, numbers without a source.

Tagline and boilerplate

The marketing OS.

Setting	Geist, weight 750, -2.8% tracking, always with the period.
The period	May be coral #EC5828; never any other color.
Placement	May sit under the wordmark on covers. Never a headline substitute in running copy.

Boilerplate — use verbatim:

Fikirtive is the all-in-one marketing OS for small businesses. It gives merchants complete, hands-on marketing tools — creation, campaigns, scheduling, and publishing — plus Otto, an AI marketing operator that researches, plans, and executes with the merchant's approval. Every action is transparent: merchants see what things cost before they run, and everything leaves a trail they can read. Fikirtive is operated by BELCORT SDN BHD.

fikirtive

The marketing OS.
